

# GREASE TRAP TREATMENT

## Unique Solutions For Everyday Problems

Ecogreen provides a unique range of commercially proven products which provide effective, economical and environmental solutions to a multitude of everyday hygiene issues.

**Ecogreen Grease Trap Treatment** is excellent in dissolving fats, oils and grease within the grease trap as well the plumbing system. This gives the product a great ability to prevent blockages, heavily reduce odours, eliminate drain flies and greatly reduce the amount of waste within the grease trap.

This product is perfect for any establishment which produces large amounts of grease and oil based waste, such as food manufacturers, restaurants, hotels, cafés, fast food outlets and much more.

Grease Trap Treatment is an active biological product containing different strains of beneficial bacteria, surfactant and a refreshing lemon scent.

### Product Benefits:

- ✓ Removes waste, grime & lime scale
- ✓ Eliminates odours
- ✓ Prevents plumbing blockages
- ✓ Helps prevent drain flies
- ✓ Targets areas deep within plumbing system
- ✓ Active biological product

### Environmental Benefits:

- ✓ Safe to use
- ✓ No harsh chemicals or acids
- ✓ Non-toxic & non-caustic
- ✓ No damage to the environment

## How does Ecogreen Grease Trap Treatment Work?

Ecogreen Grease Trap Treatment contains specific strains of beneficial bacteria which work to degrade fats, oils and grease within drains, plumbing and grease traps. The bacteria break down the waste compounds and digest the waste, reducing the amount of solids. The surfactant allows the bacteria to adhere to the walls of the plumbing, reducing the chance of a costly blockage occurring.

This reduction in fats and oils heavily reduces odours, and in turn, drain flies are largely removed.

## Directions for use:

This product can either be dosed automatically or manually depending on the specific requirements. When dosed manually, a predetermined amount of product should be poured down all kitchen drains that lead to the grease trap on a regular basis.

For automatic dosing, a specialised dosing unit must be installed and set to dose the required amount of product regularly throughout each working day.

For more information on dosage rates / dosing units, please contact ETG.

**DO NOT USE IN CONJUNCTION WITH DISINFECTANTS AND SANITISING AGENTS.**

## Packaging Options:

- 20 Litre (larger containers are available upon request)
